SPI ENGINEERING
— Simple, Precision and Innovation —

No need to
disassemble,
damage or cut.

**Any scratches, spots of dirt
and small holes
can't escape from this.**

SPI ENGINEERING
— Simple, Precision and Innovation —

As long as there is an invisible place Our challenge continues.

Simplicity is the ultimate sophistication

【Simple】

Our commitment is to deliver simple solution with competitive features while keeping cost as affordable as possible.

【Precision】

Our commitment is to deliver valuable solution to those who require precise work as precision instrument.

【Innovation】

Our commitment is to bring innovation into industry and customers through our products.

SPI ENGINEERING Co.,Ltd.
CEO : HARAYAMA KOICHIRO

Company Profile

Company Name	SPI Engineering Co.,Ltd. 2592-5, Inaba-Minamimata, Nagano City,
Address	Nagano, JAPAN 380-0917
Date of Establishment	2006. July.13
Capital	9,990,000yen
Employees	10
Business Outline	Manufacturing and sales of electronic, precision, and medical products including R&D related to these products.
Representative Director	CEO : HARAYAMA KOICHIRO

Our Main Customers

【Automotive】	TOYOTA, HONDA, NISSAN, DAIHATSU, SUBARU, SUZUKI
【Manufacturing】	SONY, PANASONIC, HITACHI, RICOH, KOMATSU
【Heavy Industry】	mitsubishi, KOBELCO
【Railway】	JR (JAPAN RAILWAYS)
【Telco】	NTT(Japanese telecommunications company)
【Aerospace parts】	JAXA

About Industrial Borescope

Features

The SPI ENGINEERING Video Borescopes has CMOS sensor at the tip of the probe. You can see inside the holes that you cannot see, and you can use it to inspect your product or equipment.

Please use as a set with **INTERFACE** or **DEDICATED MONITOR**

(Note) SPI Engineering sells products only to corporate customers and rents demo machines. Please note that we do not do business with general (individual) customers.

Super-Ultra Small Industrial Video Borescope

Model number : HNL-0.98CAM120 series

ϕ 0.98mm

Equipped with wide-angle lens

With side view attachment(→P14)

Detailed specifications(→P15)

An Industrial Borescope with a tip diameter of 0.98 mm.
It is the world's thinnest image sensor type Industrial Borescope that does not use fiber (according to our research).

Super-Ultra Small Industrial Video Borescope

Model number : HNL-1.3CAM120

ϕ 1.3mm

Equipped with wide-angle lens

With side view attachment(→P14)

Detailed specifications(→P15)

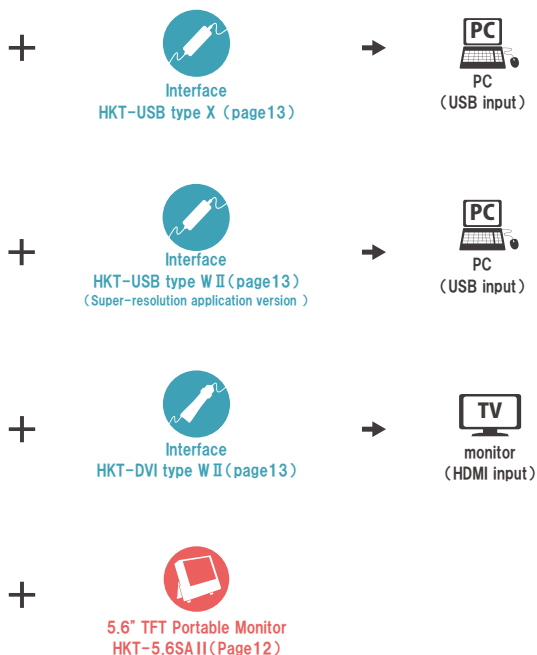

An Industrial Borescope with a tip diameter of 1.3 mm. You can inspect even small holes that could not be inserted with conventional products.

【Variations in use】

Industrial Borescope
HNL-0.98CAM120SQ
HNL-1.3CAM120 (S)

Super-Ultra Small Industrial Video Borescope

Model number : HNL-1.8CAM120

ϕ 1.8mm

An Industrial Borescope with a tip diameter of 1.8 mm.

It is a high-pixel image sensor type Industrial Borescope that does not use fibers, and can be easily used anywhere with simple functions. Although it is a very small camera with a tip diameter of ϕ 1.8 mm, it has 400 x 400 pixels and is useful for inspecting foreign substances, scratches, burrs, etc. that were difficult to find until now.

Equipped with wide-angle lens

With side view attachment(→P14)

Detailed specifications(→P15)

Super-Ultra Small Industrial Video Borescope

Model number : HNL-2.5CAM120

ϕ 2.5mm

An Industrial Borescope with a tip diameter of 2.5 mm.

HNL-2.5CAM120 is an Industrial Borescope developed mainly for use in inspection lines. In addition to the shape that is easy to hold, it also comes with a ring that can fix the wire.

Equipped with wide-angle lens

Detailed specifications(→P15)

Ultra Small Industrial Video Borescope

Model number : HNL-2.9CAM series

φ 2.9mm

With side view attachment (→P14)

Detailed specifications (→P15)

Focal range

There are two types of models in the HNL-2.9CAM series. You can select and use the camera with the best focus for the work from the one that focuses close (N) and the one that focuses far (F).

Model number	HNL-2.9 CAM35N	HNL-2.9 CAM35F
Angle of view	35°	35°
Depth of field	5mm~10mm	10mm~50mm
Image diagram		

Tube variation

There are standard tub and 2 types, and you can select the material of the camera tube according to the usage environment.

Ultra Small Industrial Video Borescope

Model number : HNL-2.9CAM120K

ϕ 2.9mm

Equipped with wide-angle lens

With side view attachment(→P14)

Detailed specifications(→P15)

Borescope with a short hard tip

HNL-2.9CAM120K (Snake Camera)

The hard tip is short, making it easier to insert into a bent workpiece than other borescope cameras. In addition, the light source at the tip of the camera is equipped with an optical fiber light guide to achieve brighter illumination than our HNL2.9CAM borescope of the same diameter.

CAUTION (Please refrain from sharp bending of R30mm or less. When the inside of the work is bent at a right angle If the surface is uneven, it may not be possible to insert the borescope.)

Snake Camera Protector

Protects the tip of the Borescope Camera.

It is especially recommended when the borescope is used frequently and the tip is scraped.

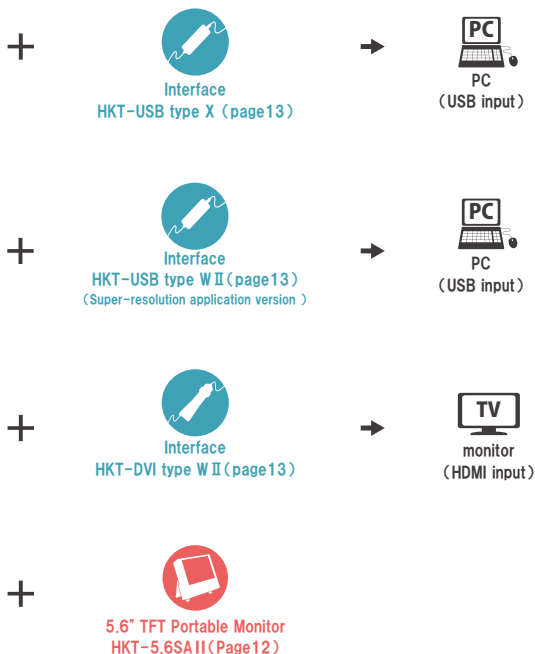

Model number	HNL-2.9PT
Outer diameter	ϕ 3.3mm×L5.5mm

【Variations in use】

Industrial Borescope
HNL-2.9CAM120K

Side View Camera

Model number : SDV-4.0CAM120

φ 4.0mm

A side-view camera that you can see the side with respect to the insertion direction. You can choose from two types : rigid pipe specifications that do not bend and shape retention specifications that bend.

Drawings

Specification

Side View Camera : SDV-4.0CAM120 (H)
Angle of view 120°

HNL-4.6 CAM90N
Angle of view 90°

Selectable from 2 types of specifications according to the application

SDV-4.0CAM120 rigid pipe specifications
(Non-flexible)

SDV-4.0CAM120H shape retention specifications
(Flexible)

The standard holes for which SDV-4.0CAM120 (H) can be used are φ9 mm or more and M8 or more.

φ9mm or more
M8(JIS) or more

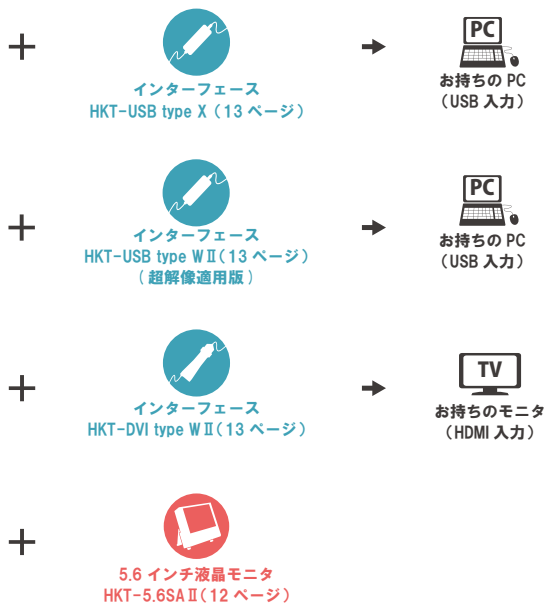

The focus range is
3~50mm.

If the hole to be inserted is too large or too small, you will not get a clear image.

【使用バリエーション】

側視カメラ : SDV-4.0CAM120 (H)

Industrial Video Borescope

Model number : HNL-4.6CAM series

φ 4.6 mm

With side view attachment (→P14)

Detailed specifications (→P15)

Depth of field

There are two models in the HNL-4.6CAM series. You can select and use the Borescope camera with the best focus for the work from the one that focuses near (N) and the one that focuses far (F).

Model No.	HNL-4.6 CAM90N	HNL-4.6 CAM90F
Angle of view	90°	90°
Depth of field	5mm~10mm	10mm~50mm

Tube variation

There are standard tub and V type, and you can select the material of the camera tube according to the usage environment. V type has better wear resistance than standard tube.

SUS blade coating (V type)

High-Definition Industrial Video Borescope

Model number : HNL-4.6HDC110SQ

φ 4.6mm

Equipped with wide-angle lens

With side view attachment(→P14)

Specifications(→P16)

1 million pixels (HD)

Tip diameter : 4.6 mm

The high-definition Borescopes (HNL-4.6HDC series) are Industrial Borescope that has 1 million pixels (720 pixels in height and 1280 pixels in width) while having a diameter of φ 4.6 mm at the tip of the Borescope.

You can choose from two specifications, standard tube specifications and tubeless specifications, according to the work you want to see. You can easily check the video on your PC or TV.

Full High-Definition Industrial Video Borescope

Model number : HNL-6.0HDC

φ 6.0mm

Equipped with wide-angle lens

With side view attachment(→P14)

Specifications(→P16)

2 million pixels (FHD)

Tip diameter : 6.0 mm

Full HD Borescopes (HNL-6.0HDC series) are industrial Borescopes that display 2 million pixels (constant 1080 pixels, horizontal 1920 pixels) CMOS pixels.

High-definition Borescopes have about 12 times as many pixels as conventional Borescopes (compared to our company), so you don't have to worry about the roughness of the image even if you enlarge or print it. Furthermore, because it uses a wide-angle lens, it is possible to observe the entire subject in detail while projecting it on a large screen.

▶ Tube variation

Standard tube specifications (PE coated tube)

HNL-6.0HDC140SQ

This is a tube coated with polyethylene having excellent lubricating property when pushed in. Since the borescope power supply line and the tube are partitioned by a stainless coil, external damage is not exerted easily on the tube in this structure.

Shape retention specifications

HNL-6.0HDC140SQ H

In this type, the shape of the tube can be retained. Since the entire tube is formed of metal (copper wires and SUS wires), this tube has high rigidity. The outer circumference has a bellows-type structure, and therefore, the push-in capability is inferior to that of a PE-coated tube.

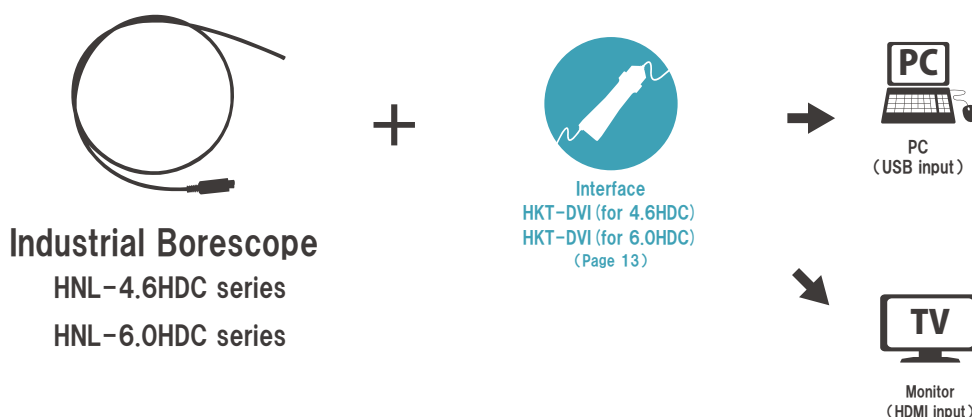

Tubeless specifications

HNL-6.0HDC140SQ TL

This product use electric wire only. The wire passed the quality test for 100,000 times bending. You can attach many places without irritation with hard tube.

【Variations in use】

Industrial Borescope
HNL-4.6HDC series
HNL-6.0HDC series

Interface
HKT-DVI (for 4.6HDC)
HKT-DVI (for 6.0HDC)
(Page 13)

PC
(USB input)

Monitor
(HDMI input)

Borescope Dedicated Monitor

Model number : HKT-5.6SA II

Detailed specifications (→P14)

It is a dedicated monitor for industrial endoscopes. It is compatible with all cameras except high-definition cameras.

It comes with an image saving function, allowing you to save and review images instantly on-site with the endoscope.

The images are saved in JPEG format on an SD card, making it easy to manage them on a computer.

For power supply, it is equipped with a battery holder in addition to an AC adapter, allowing it to be used even in outdoor or electricity-free locations.

Common specification of monitor

Adjustable LED lights intensity

Intensity of White LEDs mounted on the tip of camera can be adjusted by switches on the monitor in 8 different levels of brightness.

5.6"

Tilting Desk-Top Mount

Angle of monitor screen can be easily adjustable according to your comfort and the stand can be stored to monitor when it is not in use.

User-replaceable battery operations

Portable monitor can be also operated by regular battery. HKT-5.6SA requires 4 C batteries.

5.6"

Save images to external memory

In the same way as a typical digital camera, you can capture images by simply pressing a button, and these images are stored on the included memory media (JPEG format).

When you have finished capturing images, you can use the data in whichever way suits your purpose, such as transferring the image data to a PC in the same way as a photograph taken with a digital camera.

SD card

AE ON/OFF function

There is a function to switch between AE mode and manual gain mode.

This function is useful for observing mirror-finished subjects susceptible to halation.

Guide function

The brightness of the LED light, number of pictures taken, and remaining battery life are displayed at the top left of the monitor screen.

USB Interface

Model number : HKT-USB type2 , HKT-USB typeX , HKT-USB typeW II

Detailed specifications (→P16)

- Can be connected to your PC (Windows 10 recommended)
(not compatible with Macintosh)
- Equipped with image save (capture) function
- Switchable between auto gain and manual gain
(Effective for subjects that are prone to halation)
- Equipped with LED lighting dimming function
- Movable tip industrial endoscope can also be connected.

External view

USB Interface
HKT-USB type2 , HKT-USB type4

AMCap for HKT-USB

When connecting an industrial borescope to a PC, the viewer software to be used.

USB/DVI Interface

Model number : HKT-DVI typeW II^{※1}, HKT-DVI (for HNL-4.6HDC)^{※2}, HKT-DVI (for HNL-6.0HDC)

※1...HKT-DVI type W II only supports DVI output.

※2...If the camera length of the HNL-4.6HDC exceeds 2m, the DVI output will be limited to 30 FPS.

Detailed specifications (→P16)

【connect to PC】

Windows 10 recommended
(Not compatible with Macintosh)

【connect to television】

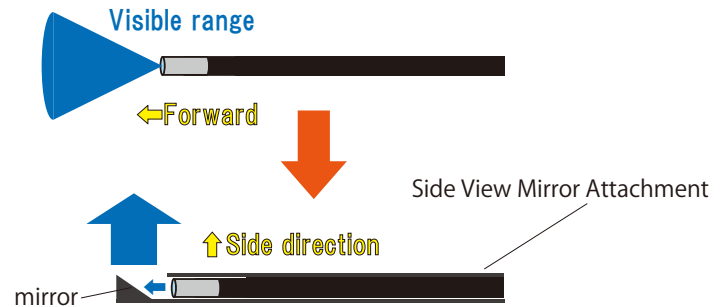

By operating the USB / DVI interface (HKT-DVI), you can adjust the brightness and brightness of the image and save the still image.

Camera Attachment

※The presence or absence of each attachment differs depending on the model of the borescope.
Please check in advance if necessary.

• Side View Mirror Attachment

The mirror at the end of the pipe allows you to see the side.

• Straight view Attachment

Holds the tube shape of the borescope. Supports insertion into straight holes.

We accept mirror replacement repair.

Please contact us for details.

※ 1

φ 2.9mm side view attachment : HNL-2.9S9D-G
φ 4.6mm side view attachment : HNL-4.6S9D-G

The above is a sapphire glass specification.
Compared to polished metal mirrors, it is less likely to get scratched.

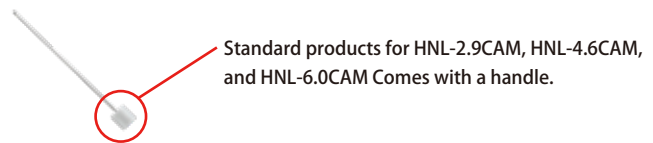

※1・・・Models are limited to φ 2.9mm side view or φ 4.6mm side view.

Side View Mirror Attachment - Straight View Attachment specification

Power Unit	USB bus power			DC6V (AC adapter)		At USB output: USB bus power At DVI output: DC6V (AC adapter)	
Compatible PC (program)	Windows 10 recommended (AMCap(Viewer software) / "camera" app. (in windows 10)) ※1					Windows 10 recommended AMCap(Viewer software) "camera" app. (in windows 10) ※1	
Compatible monitors				HDMI input 720P (60Hz) Compatible TV or monitor		HDMI input 720P (60Hz), 1080P (30Hz) Compatible TV or monitor	

※1 We recommend the application program AMCap. However, in the case of Windows 10, it works with the "camera" of the standard application built into Windows. (Still images and videos can be saved)

※2 • • • If the camera length of HNL-4.6HDC is 2m or more, the DVI output will be 30FPS.

SPI ENGINEERING

— Simple, Precision and Innovation —

CAUTION

- When Video Borescope LED at the tip is used continuously at 40°C or higher, The LED lifetime may be extremely reduced.
- About electrostatic breakdown voltage
The CMOS sensor at the tip of the borescope camera is extremely sensitive to static electricity (static electricity withstand voltage 2kV)
When handling this product, it may be necessary to take measures against static electricity, such as static electricity removal by workers and static electricity removal in work spaces.
Please contact us for details.
- About product dimensions (tolerance)
Actual product dimensions and catalog values may be slightly different.
Please contact us for details.
- Warranty period
1 year warranty for monitor and interface.(Excludes those due to the user's responsibility)
Borescope camera is not guaranteed. (Excluding initial failure)
- The specifications and appearance may change without notice.
These products are for industrial use. Please do not use these for medical.
